

NOTEBOOK & LAPTOP SECURITY

Laptop locks PRODUCT CODE 7040/7030

The easy way to secure your highly portable devices during daily use. These small, discreet locks offer incredible strength and flexibility, tethering your device to a secure fixed point within the work area with a looped cable.

Key options include:

Keyed alike - all locks work on the same key.

Keyed to differ - all locks have different keys.

Master keyed - all locks have different keys but one key opens all locks in that suite.

Laptop clamps PRODUCT CODE 6820/6810

The perfect way to display a laptop securely. These high strength clamps have passed our rigorous trials and testing procedures to deliver a user friendly solution that won't compromise any of the laptop's functionality.

The design of the clamp system is incredibly strong, flexible in its use and can easily be adjusted to accommodate a vast array of products. Rotating base designs are available for display products.

Slotlox widget PRODUCT CODE 7060

The simplicity and flexibility of the Slotlox system offers an extremely versatile, security device for any laptop or screen with a security slot. The widget allows multiple devices to be daisy-chained on one secure cable using either a looped end or 'stopper notch stopper' cables for maximum flexibility and anchor point solutions.

Designed and developed by Loxit, these widgets offer all the Loxit innovation, quality and security with great economy especially when securing multiple devices with one cable.

Available in a wide variety of configurations, please contact us to discuss your requirements.
