

POWER PAD RANGE

Some users already have secure rooms or strong boxes but need a solution that will enable them to sync and charge numerous devices in one location with ease, secure in the knowledge that the process is being controlled by specialist equipment that is fit for purpose. The universal USB sync and charge will accommodate up to 15 devices including iPads, tablet PC's, mobile phones, digital cameras, MP3 players and any other USB chargeable item. With built-in energy saving and management technology to provide you with peace of mind and improved product longevity.

CHARGE >

Using professional grade USB chargers they are able to continuously output specific volumes ensures just the right amount of power is supplied to each unit. This is important in ensuring the fastest turnaround for your devices and ensures longevity. When a device is plugged into any one of the ports, the internal processor profiles the device and ascertains the correct amount of charge to deliver to that specific device. This means that you are able to mix and match devices from different manufacturers and charge them all at the same time, for example, this could include tablets, mobile phones, e-readers, 3D glasses, GPS, cameras...basically anything that can be charged by USB.

SYNC >

Syncing the devices is easy, just connect the USB cable provided, plug it into the stand alone unit and the port on your device. Then connect the host computer to the sync and charge unit. The host computer is then able to 'see' all the devices connected to the charge unit and the user is able to manage each device.

MANAGE >

Free software provides detailed management of devices whilst syncing and charging, allowing you to analyse the status and health of individual devices.

Universal product - Simple to connect to a host computer, sync and charge up to 15 iPads, iPad minis or any other tablet or USB chargeable device, simultaneously.

The perfect charge - each device's charging profile is perfectly delivered, ensuring optimum charging across the board via USB.

Sync and charge up to 16 iPads at once - via iTunes subject to operating system*

Quality parts - includes a UL-Listed dual voltage PSU.

Small and discreet - mounts on or under a desk or counter. Simply fix through the 4 formed holes in the outer case.

Future proof - updatable firmware administered through the host computer port. Simply connect to the web for free updates.
