

Hi-Lo SCREENLIFT 750 ELECTRIC WHITEBOARD TROLLEY

Loxit's Hi-Lo range consists of electrically height adjustable wall mounts, floor mounts and trolley mounts with universal bracket sets to suit all whiteboard and projector applications (up to 80" board in 4:3 aspect or 105" in 16:10 aspect).

The ScreenLift 750 utilizes Loxit's patented projector mounting system which allows all trolleys to pass through standard size doorways with projector mounted up to 1500mm throw, providing a significantly increased choice of projector.

The 'smart design' also allows the trolley to be upgraded to integrate a range of peripherals including laptops, PC's, Apple TV, Mac Mini or speaker systems complete with additional power strips to power these units. Because this is a mobile stand we have ensured that the movement is as easy as possible, with a large grab handle to the rear and special easy wheel, heavy duty casters that individually lock and easily glide.

The Hi-Lo whiteboard range has been delivering interactive solutions for over 10 years with a proven track record around the world. Designed to accommodate users of all heights, from toddlers to fully grown adults and providing easy access including wheelchair users, enabling the delivery of a truly interactive experience.

Spatially aware - designed to fit through standard doorways.

750mm height adjustment - means all users are able to access the screen.

Go configure - user configurable maximum and minimum heights may be set to allow the safest operation possible and preventing collisions with ceilings.

Laptop mount - a really useful mount for a laptop (optional extra) to run interactive software.

High quality construction - the robust steel construction is powder coated in black creating a highly durable finish.

Warranty - a 12 month return to base warranty is included to provide peace of mind.

Flick of a switch - the electronic lift mechanism is capable of moving whiteboards up to 105" in diameter.

Sound and vision - speaker mounts are a really useful accessory for creating a truly immersive interactive experience.

Quick start - all our lifts are delivered fully assembled on a pallet (in the UK). Simply hang the board and mount the projector.

Universal projector mount - accommodates short throw and ultra short throw projector with throw distances of up to 1500mm. The trolley can also mount non-interactive whiteboards to work with interactive projectors.

Easy wheel - individually locking, easy glide, high quality twin-caster wheels ensure moving the trolley is easy.
