

Lox-av trolley

Portable, Secure Projector and AV Storage

Secure mobile AV trolley allows a permanent projector set up to be shared between user groups with minimum fuss.

Application:

Used in education and training establishments where projectors are shared between rooms.

Perfect where the AV system has additional components i.e. DVD, amp, speakers etc. which can remain set up in one compact, secure system.

Key Features:

The Lox-AV trolley enables a full AV setup with projector to be permanently setup, mobile and secure in an efficient and stylish solution with minimum fuss.

Only the projector requires connection once removed from the secure cabinet and positioned on top of the trolley for use. All other components may remain attached to each other for ease of set-up.

Cabinet contains 3 shelves - 1 being adjustable to accommodate a variety of configurations.

High quality - all welded steel construction

Rebated top of cabinet prevents items sliding off

Extremely maneuverable with high quality heavy duty casters

High security - 2nr 7 lever mortise safe locks with anti-jemmy bar design, all welded construction and full length piano hinges.

The trolley may be securely docked in open space, or to the fabric of the building, even in a lockable room for the highest security.

Charging kits are available for convenience.
